

Sprint Review and Retrospective

Retrospective for Sprint 1 was performed after the Sprint 1 Review/Demo.

Sprint Review and Retrospective

WHAT WENT WELL?	WHAT COULD HAVE GONE BETTER?
<ul style="list-style-type: none">○ Team spirit on point! Regular check-ins kept the vibe collaborative and everyone felt comfortable sharing ideas.○ Milestones unlocked! We wrapped up important tasks and saw real progress on the system—very motivating.○ Level-up moments. We picked up new skills on the way, especially when facing tricky challenges together.	<ul style="list-style-type: none">○ Database structure was tough to design and slowed us down at times.○ System understanding was tricky, and it took longer than expected to grasp all the moving parts.○ Drawings were complex and kept changing, which created extra rework.○ Learning GitHub wasn't easy, and it caused some challenges with version control.
WHAT WILL WE TRY NEXT?	WHAT QUESTIONS DO WE HAVE?
<ul style="list-style-type: none">○ Database: We'll design it together from the start of the sprint to avoid changes later.○ System: We divided and prioritized functions across sprints, so now we're more familiar with it.○ Drawings: Since they depend on the database, we'll finalize them early to keep them stable.○ GitHub: We'll keep watching tutorials and support each other to get better at using it.	<ul style="list-style-type: none">○ Which diagramming tool or format do you prefer we stick with, to avoid confusion?○ How can we make sure we're aligning our work with the bigger project vision more effectively?○ Are there tools you recommend to improve our workflow?○ How do you evaluate if our sprint was successful?
